

HOW TO CREATE IAM USER

- 1.Login using root account.
2. In Dashboard/Console search Identity Access Management (IAM).
3. In IAM Dashboard Click User.

4. In Dashboard user click Create User.
5. In Specify user details you can fill user name with your name account.
6. Checklist box “Provide User Access to the AWS Management Console.
7. Choose custom password and then make your own password.

8. In Set permissions dashboard choose Attach policies directly.
9. Then Choose what policies you want for that account.
(Here I want create admin account , so I choose AdministratorAccess, AmazonEC2FullAccess, and AmazonS3FullAccess)
10. Then you can next to create user.
11. You will get notification if you success create user

Set permissions
Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. [Learn more](#)

Permissions options

- ☐ Add user to group
Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.
- ☐ Copy permissions
Copy all group memberships, attached managed policies, and inline policies from an existing user.
- ☒ Attach policies directly
Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

Permissions policies (1/1451)
Choose one or more policies to attach to your new user. [Create policy](#)

Permissions policies (1/1451)
Choose one or more policies to attach to your new user.

Filter by Type: All types (308 matches)

Policy name	Type	Attached entities
☒ AdministratorAccess	AWS managed - job function	0
☐ AmazonEC2ContainerServiceRole	AWS managed	0
☒ AmazonEC2FullAccess	AWS managed	0
☐ AmazonEC2ImageReferencesAccessPolicy	AWS managed	0
☒ AmazonS3FullAccess	AWS managed	0

Tags - optional
Tags are key-value pairs you can add to AWS resources to help identify, organize, or search for resources. Choose any tags you want to associate with this user.
No tags associated with the resource.
[Add new tag](#)
You can add up to 50 more tags.

[Cancel](#) [Previous](#) [Create user](#)

User created successfully
You can view and download the user's password and email instructions for signing in to the AWS Management Console.

11. After that you can log out your root account.

12. In Dashboard log in you will see the Account ID or Alias already filled automatically.

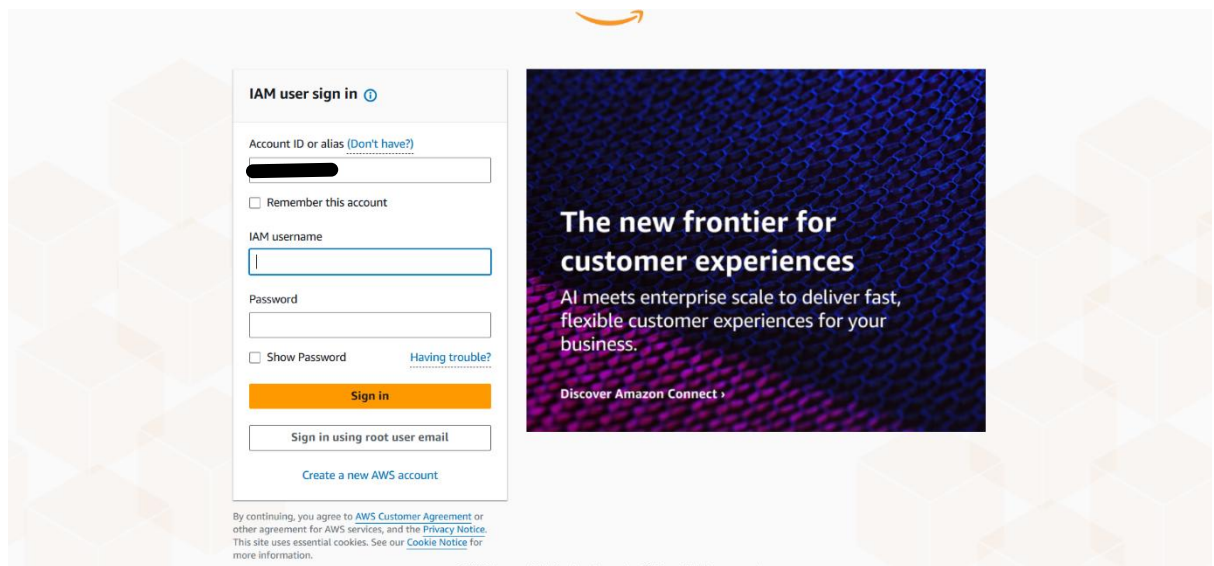

(remember to save the id if you log in using account user)

13. Then fill in IAM username and password, use account username and password you created earlier.

14. After log in you will see dashboard password reset.

15. Fill your old password and then create new password.

16. After doing that you will automatically enter the AWS page with user account that was created earlier.

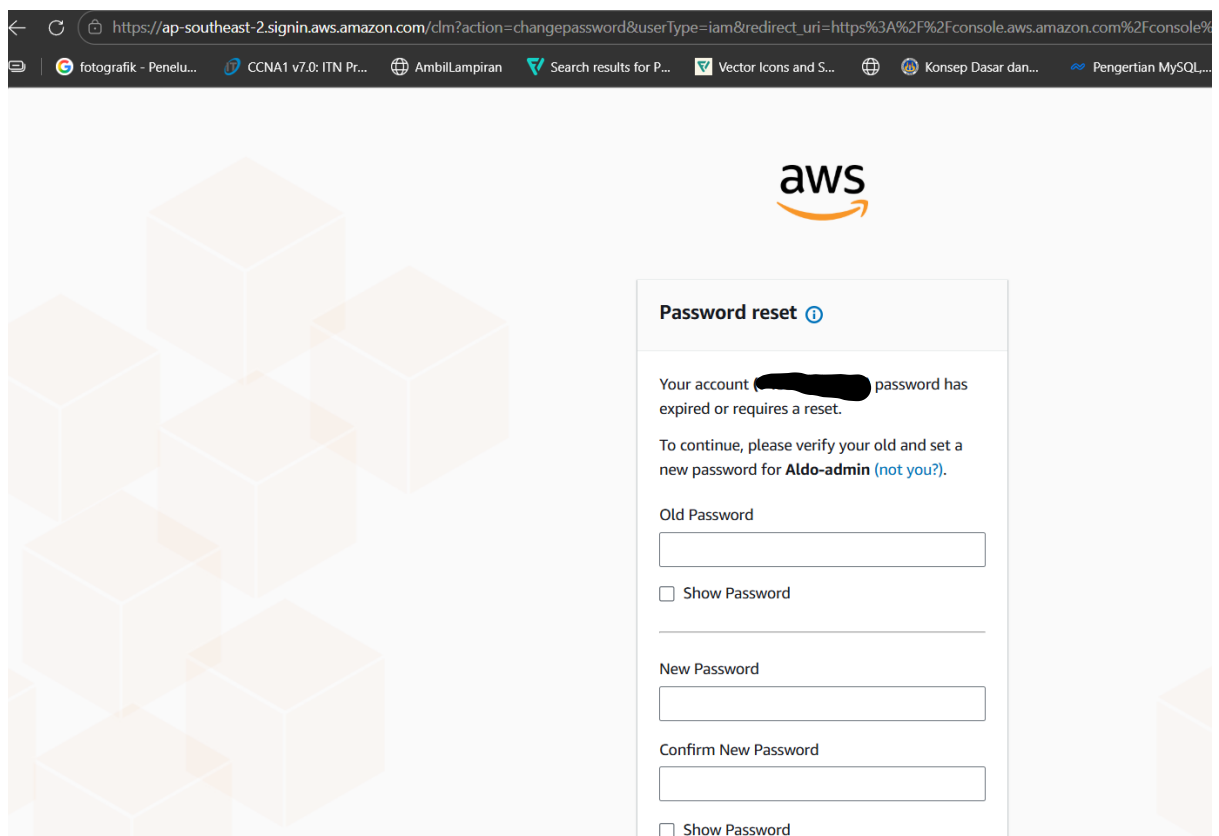

The screenshot shows the AWS IAM user sign-in page. On the left, there is a sign-in form with the following fields and options:

- IAM user sign in** (with an information icon)
- Account ID or alias (Don't have?)**: A text input field with a redacted value.
- ☐ **Remember this account**
- IAM username**: A text input field.
- Password**: A text input field.
- ☐ **Show Password** and a link [Having trouble?](#)
- Sign in** (orange button)
- Sign in using root user email** (button)
- [Create a new AWS account](#) (link)

Below the form, there is a disclaimer: "By continuing, you agree to [AWS Customer Agreement](#) or other agreement for AWS services, and the [Privacy Notice](#). This site uses essential cookies. See our [Cookie Notice](#) for more information."

On the right, there is a promotional banner for Amazon Connect with the text: "The new frontier for customer experiences. AI meets enterprise scale to deliver fast, flexible customer experiences for your business. Discover Amazon Connect >"

The screenshot shows the AWS Password reset page. The browser address bar displays the URL: `https://ap-southeast-2.signin.aws.amazon.com/clm?action=changepassword&userType=iam&redirect_uri=https%3A%2F%2Fconsole.aws.amazon.com%2Fconsole%2Fiam%2Fusers%2F%5B%5D%2Freset-password`. The browser tabs include "fotografik - Penelu...", "CCNA1 v7.0: ITN Pr...", "Ambillampiran", "Search results for P...", "Vector Icons and S...", "Konsep Dasar dan...", and "Pengertian MySQL...".

The page features the AWS logo at the top center. Below it, the "Password reset" section (with an information icon) contains the following text and form fields:

- Message: "Your account [redacted] password has expired or requires a reset."
- Instruction: "To continue, please verify your old and set a new password for **Aldo-admin** (not you?)."
- Old Password**: A text input field.
- ☐ **Show Password**
- New Password**: A text input field.
- Confirm New Password**: A text input field.
- ☐ **Show Password**
